CAREER OBJECTIVE

Computer Science Engineering student specializing in AI/ML, seeking to build a strong career by applying programming, data-analysis, and UI/UX skills. Continuously improving through hands-on practice, eager to contribute to real-world projects in a growth-oriented environment.

EDUCATION

Lovely Professional University, Punjab 2025 – Current

B. Tech in Computer Science Engineering, Specialization in Artificial Intelligence and Machine Learning— 7.86 CGPA

RMS Academy, Uttar Pradesh 2024 – 2025

Senior Secondary School (PCM) — 70% Overall

TECHNICAL SKILLS

- **Languages:** Python, C, JavaScript, HTML5, CSS3, PostgreSQL
- **Data & ML Libraries:** NumPy, Pandas, Matplotlib, Seaborn
- **Data Analysis:** Data Cleaning & Preprocessing, Exploratory Data Analysis (EDA), Data Visualization
- **Web Development:** Django (Basic), MongoDB
- **UI/UX Design:** Cinematic/editorial layouts, typography hierarchy, dark-theme design systems, responsive design
- **Tools & Technologies:** VS Code, Git, GitHub, GitHub Pages, Replit, JupyterLab, Google Colab, Google Antigravity, Vercel
- **Certifications:** Python, C, Git & GitHub, JavaScript, Artificial Intelligence, Fundamentals of ML & AI

PROJECTS

[Campus Connect](#)

A group project Full-stack academic resource platform for university students, built with a teammate.

- Built with Next.js 16, React 19, TypeScript, and Tailwind CSS v4 for a responsive dashboard UI.
- Integrated Google OAuth (NextAuth) and Firebase for authentication and profile management.
- Provided most of the Subject PPTs ,E-Textbooks and Courses.

[Last Minute Life Saver](#)

MERN-stack emergency assistance platform for quick access to critical resources.

- Built a React.js front end with a Node.js/Express.js backend and MongoDB database.
- Planned Geolocation and Google Maps API integration for location-based emergency support.
- Designed a responsive, one-click interface prioritizing speed during critical situations.

[Exploratory Data Analysis Projects](#)

Applied Pandas and Matplotlib/Seaborn to derive insights from sample datasets in coursework.

- Cleaned and transformed raw datasets using Pandas DataFrames for analysis-ready data.
- Built visualizations (bar charts, histograms, heatmaps) to communicate trends and patterns.
- Performed exploratory analysis to identify correlations and outliers in sample datasets.

[Red Dead Redemption II — UI/UX Experience](#)

Cinematic, scroll-first landing page built as an open-source UI/UX design reference.

- Designed a cinematic hero section with split-screen character-spotlight layouts.
- Built fixed section navigation across Home, Story, Characters, Gallery, Timeline, and About.
- Paired editorial serif and condensed typography with a dark, red-accent color palette.
